Welcome to the Astrological Society of North Texas!

Please join us on Sunday for “The Four Ladies We Live With” a presentation by our own Donna Henson!

Would you like to wake up with four more energies to use in the charts you do besides the ten planets? You can if you don’t already do so.

There is CERES which tells us about “The Nurturing You Got and the Nurturing You Will Give”. There is PALLAS which indicates “What You'll Do to Please Daddy”. There is VESTA which tells you “The Focus of Your Destiny”, and there is JUNO which indicates “Your Capacity for Meaningful Relationships”.

They’re all considered to be feminine, “The Four Ladies We Live With”, yet they are just as applicable to men as to women. Remember, Venus and the moon are feminine, and we are all influenced by them just as we are all influenced by the masculine energies, Mars and the Sun.

Donna has used the asteroids for family and a few friends, but not regularly until Fei and David Cochrane contacted her and asked her to write interpretations of these to each other, the ten planets and Chiron, the angles, MC, Ascendant and Vertex, and the nodes of the Moon, as well as background material. She’s convinced now how valuable they can be.

The Cochrane’s are formatting these into reports that are individualized for each customer based on his or her data. These may be purchased from Cosmic Patterns.

We’ll look at the charts of several men and women to see how they’ve worked in their lives, as well as getting a few tidbits of information such as:

Did you know that Ceres-Pluto afflictions often lead to food problems? See, it isn’t those double cheeseburgers that give us trouble. It's Ceres-Pluto!

President's Message

Distinct impressions can be made from the smallest of forms. Consider the relative size of Mercury or Pluto compared to the size of Jupiter, or even the size of the solar system itself. If the solar system was a football field, the Sun is smaller than a golf ball and the Earth is one fourth the size of a ball-point of a ball-point pen. Mercury and Mars are one tenth the size of that ball-point.

Yet we as astrologers study and embrace the impact these “tiny” planets and their movements have on us, or at the very least, signal the impacts that happen in our lives. We zoom in closely on the finer details of aspects, myths, placements and relationships of patterns so we can understand more about our universe. And who would doubt the impact or impression that Mercury or Pluto makes compared to Jupiter?

We, too, make impressions in many ways.

We can make a lasting impression on our future with tiny changes to our daily habits. We won’t see any change at all in one day, or even in one week, sometimes, if we take a 20 minute walk. But after a year, with a 20 minute walk every day, the impression it makes on us is unmistakable.

The impressions we make don’t have to be consistent and cyclic to make a long lasting difference. Even a small change in reaction one day, one time, by giving someone a boost at just the right time, right when they needed it, can make a change that can last a lifetime. It might sound silly or inconsequential, but I’m sure if you think back, you’ve probably felt like you could have used a boost at some point. And, similarly, if you think back, maybe someone has given you a boost. Has that changed your life for the better? Did it lead to other better things? Was it linked to a chain of events?

I think you can make an impression on the Astrological community. ASNT exists to help the DFW community have a source of education about astrology. One major way to make your impression is to join us in our meetings and participate in the learning process. Ask questions if you want more info. Give info if you have some to give. It’s as simple as that.

A second way to make an impression is to volunteer. It doesn’t matter where you volunteer – a school, a shelter, a pet place... anywhere that serves your passion. If astrology is your passion, ASNT has two open positions – Publicity and Programs Director. We’d love to have you consider joining us if you have an interest in Astrology and can put in a little time each month into furthering that interest. You don’t need any special skills beyond that.

Your time would make a distinct impression upon our community, so we hope you join us this month and share your time with us. We have our own Donna Henson sharing her knowledge with the rest of us on four key asteroids we can add to our chart interpretations. Come let her make an impression you.

Astrologically Yours,
Wayne Hall

State of the Planets for April

Conjunctions - Dynamic, emphatic energy.  
Sextiles – Finding assistance; opportunities.  
Square – Challenges requiring action.  
Trine – Success if worked and controlled.  
Opposition – Awareness brings balance.  

Making sure a planet is direct and in good aspect for activities represented by its rulership, we find that-

**Sun (Illuminates, finds success)** – Conjunctions: Mercury April 1st, Uranus April 18th. Sextiles: none.  
Squares: Pluto April 10th. Trines: Saturn April 29th. Oppositions: none. The Sun starts the month at 12 degrees Aries, and ingresses to Taurus on April 19th.

*Traditional Planets Aspects and Stations:*

Mercury starts the month at 11 degrees Aries (going Retrograde), and then stations Direct early April 15th ending the month at 13 degrees Aries.

Modern Planet Aspects and Stations:

It is interesting to note that Andre Agassi’s MH is within 5 degrees of the new moon in April. Uranus is directly conjunct his MH and Mercury is opposite his Uranus, giving double indication of a “break”. As we know, these lunations tend to work early for a lot of people, but on April 1st Andre Agassi announced he was leaving his coaching team. Uranus also represents astrology, and our own Donna Henson has her MH within 5 degrees of the new moon this month!
Local Moon for April ~ The New Moon is at 26 degrees Aries this month on April 15th, and in our area Vega is on the horizon, inviting us to spend time listening or making music, and involve ourselves in charity work. It occurs right before the moon conjuncts Uranus, so expect the unexpected. The Full Moon is at 9 degrees Scorpio on April 29th, and is partile in trine and sextile to a powerful Saturn in Capricorn.

It has been said that the placement and condition of the moon will indicate the circumstances surrounding the beginning of your endeavor, and the planet that rules the sign the moon is in will indicate the circumstances surrounding the outcome of your endeavor also, Ivy Jacobson has said that the moon is a developing power and the final aspect indicates outcome of any venture under consideration. In selecting the day and hour for taking an action we base our decision to act or not on what she advises according to her final aspect “when all is said and done” If she is void of course the matter is also inactive with no harm done.

Happy Birthday to Aries and Taurus members!
